GRP Range

Glass Reinforced Plastic - safe, secure and weather resistant

GRP Feeder Pillars & Cabinets are ideal for low voltage electrical distribution up to 1000v. Designed with Ingress Protection from dust and water up to IP54 and approved to The Loss Prevention Certification Board (LPCB) – the leading international Certification Body in the fields of security and fire protection

Specification

- Construction - GRP Cabinets are comprised of a Single Skin GRP construction throughout walls and roof, giving a Maximum 'U' value of 3.0W/m² °C. Our larger Double Door Cabinets are also available with a GRP/12mm Plywood/GRP Composite construction throughout walls and roof, giving a Maximum 'U' value of 2.2W/m² °C
- Fire Resistance - Standard Wall construction has been designed and tested to BS476 Part 22 and exceeds a half hour fire rating. Fire retardant resin is used internally to provide a self-extinguishing laminate to BS476 Part 7 Class 2 (Surface spread of flame)
- Doors - Encapsulated Steel Reinforced, High Security Doors fitted with Stainless Steel Hinges, Double Door cabinets come with 2No. Stainless Steel Spring Tower Bolts, comes with Cylinder Night Latch Locking or Stainless Steel Hasp & Staple
- Backboard - Cabinets come with 18mm Treated Plywood Backboard as standard. Within our smaller cabinets, they are set into the mould and encapsulated in GRP, making the cabinet look empty. The backboard is there, we promise.
- Base - Single Door cabinets are manufactured with a Single Skin GRP Floor. Double Door cabinets are manufactured with a 100mm internal fixing flange.
- Finish - Internal Finish, Matt GRP White. External Finish, Semi-Gloss Smooth Gel Coat in either Green (14-C-39) or Grey (10-A-07) as standard. Other BS or RAL colour are available on request and will incur a surcharge.

Options

- Aluminium Louvre Vents of varying sizes
- Lockable Access Flap (Cat-Flap)
- 90° Stainless Steel Hold Open Door Stay
- Padlockable 3 Point Lock

Note: Both length and width dimensions are external, height is clear internal
We recommend a 'stepped' concrete base to ensure a weatherproof seal. Please ask for Standard fixing details

Root Box

Simple, effective and excellent value

Specification

- Designed to IP54
- Manufactured from 3mm HR4 mild steel plate and hot dipped galvanized to BS EN ISO1461
- Fitted with 12mm external grade treated plywood Back-board
- Supplied with Tri-Head locking
- Detachable door with weatherproof seal
- Supplied with an M8 brass earth bolt with nuts & washers on both body and door

The Root Box is ideal for situations such as providing a strong, safe housing for a cut-out supplying power to sign posts.

As its name suggests, it is rooted beside a sign post and secured to the post with 2 *Tespa Bands, the cables can then be fed up through the root tube to the enclosure.

*Tespa Bands not included but available as an extra

MRI Pillar

Specialised fully fitted pillar for NHS mobile Magnetic Resonance Imaging equipment providing electrical power on one side and water supply on the other

Specification

- Designed to IP54
- Manufactured from 3mm HR4 mild steel plate and hot dipped galvanized to BS EN ISO 1461
- 18mm external grade treated plywood Backboard
- Fitted with an M8 Tri-Head lock
- Hinged Doors with weatherproof seal
- Supplied fitted with an M8 brass earth bolt, nuts & washers on both body and door
- 1200mm wide x 650mm deep x 1200mm high
- Dedicated Marechal 415v 200 amps 3 phase socket with MCCB and Earth leakage device built-in
- 3 x Cat5 RJ45 (Ethernet) and 1 x BT PBX (Telephone) outlets on the left hand side of pillar
- Completely insulated right hand side of pillar with mains water for topping up the chillers on the MRI mobile unit

Options

- Stainless Steel 3 Point Locking System with Stainless Steel Hasp & Staple Padlock facility
- Polyester Powder Coat finished in a RAL or BS colour to coordinate with the hospitals décor
- Can be made in bespoke sizes and internal electrics to project specifications
- Document Pocket/Holder
